

xTablet T1680 Dual Pack Charger

Although the batteries are capable of charging while installed in the tablet, implementing this optional external charging station will allow you to charge multiple batteries at once. The stations are designed to daisy chain multiple of them together for fast, efficient charging.

For those who have the xTablet T1600 or T1680 fix-mounted on a forklift or in a vehicle without a power supply, the charging station is the ideal solution to get power to those batteries. LED indicator lights will notify you of the battery charging status.

Spare batteries not included.
